HANDS-ON CHALLENGE: CLOGGED PIPE

OBJECTIVES
OC San performs regular maintenance on our sewer system to ensure the wastewater flows into our treatment plants. When clogs form in the pipes it can cause the water to stop flowing and reaching OC San. Be part of our team for the day and put together a water bottle pipe with a clog and then it is up to you to unclog it.

MATERIALS
- 2 Water Bottles
- Scissors
- Tape
- Small Trash (Tissue paper, napkins, old face masks, orange slices, etc.)

Make sure to pour water in from the top opening after steps 7, 8, & 9!!
